

NCUU Memory Garden

The NCUU Congregation's vision for our Memory Garden was to create a space of natural beauty where one could pause for quiet reflection that would serve to memorialize loved ones but also provide a space to hold ceremonies and celebrations. We wanted to not only remember those we have lost but also remember good times with those still with us.

The Memory Garden was dedicated on November 13, 2010 but the garden is not meant to be finished as all things it will change and evolve over time and we hope will continue to be a place where our memories are held safely and where our lives can be contemplated. A space that will be a reminder of the ways in which all our lives have been touched by those we have loved and lost and where we can celebrate the relationships with those who are still with us. We hope that the Memory Garden will continue to promote positive and loving energy providing many more enjoyable moments in the future.
